The XXX National Meeting on Medicinal Chemistry, together with the 17th Young Medicinal Chemists' Symposium "Nuove Prospettive in Chimica Farmaceutica" (NCPF17), represents the best opportunity to share the progress of research and to favor collaborations among medicinal chemists from both academia and industry. The participants will have the chance to present the results of their studies in the highly stimulating environment of the meeting that will cover the most recent advances belonging to one or more of our peculiar Analytical, Computational and Synthetic Medicinal Chemistry topics, listed in research and therapeutic areas.

TOPICS

- Advanced methodologies in synthetic chemistry
- Advanced therapeutic tools
- Bioactive peptides and peptidomimetics
- Innovative targets in Medicinal Chemistry
- Nutraceuticals
- Artificial intelligence-powered platforms for drug discovery and predictive toxicology
- Pharmaceutical analysis
- Recent advances in protein inhibition and degradation
- Theranostic approaches in Medicinal Chemistry
